

Start	Supervisors	Schools (based in bold)	Student/title of project
2004	Benning, Knapp	SEE/Biol	Dominique Tobler Molecular pathways of biomineralization
2004	Hamer/Phillips	Biology/Geography	Nick Berry Impacts of disturbance on tropical ecosystems: a novel approach using diversity partitioning
2004	Krom/Cliff	SEE	Matthew Box (Funded from Krom EBI buyout) Response of the Nile and Sahara to Millennial-Scale Climate Change'
2004	Cywinski and Best	Physics/SEE	Martin Dawson (part funding) Developing a new technique called Neutron Geotomography
2005	Francis, Compton	SEE/Biol	Claire McDonald Herbivory in Antarctic fossil forests: evolutionary and palaeoclimatic significance
2005	Sait and Carver	Biology/Geography	Simon Harold Local and regional factors affecting the population ecology of the winter moth
2006	Lloyd, Mortimer	Geography/ SEE	Franziska Schrodt New techniques to determine plant nutrient availability in natural ecosystems
2006	Tzedakis, Collier	Geography/ SEE	Alice Milner Orbital- and millennial-scale variability during the Last Interglacial Complex: Evidence from Tenaghi Philippon, Greece
2006	Hamer, Bottrell	Biology /SEE	Paul Woodcock Impacts of perturbation on the trophic structure of tropical rain forests: a novel approach using stable isotopes
2007	Benton/Dougill	Biology/SEE	Mark Goddard Community and biodiversity benefits of Urban Garden Initiatives
2008	Baker/Hamer/Mortimer	Geography/Biology/SEE	Sophie Faucet Carbon balance of Ghanaian forests; carbon stocks and long term woody turnover
